

Chemistry Lab Test Description

Time Limit: 1 hour

Part I: Quantitative Chemistry

This part will test whether or not you know how to perform routine calculations, balancing of equations, and/or analysis of common chemistry scenarios.

Part II: Descriptive Chemistry

This part will test whether or not you know random information about important chemicals or processes.

Part III: Will you get disqualified?

This part tests whether or not you know how to act properly in a lab environment – that is to say, whether or not you know proper safety protocol.

Possible Topics

Anything that is taught in any chemistry course at Paly.
